PROJECTS

TAPATAT | barisharslan.github.io/tapatat.html
December 2018 – Present
A Patatap clone using sounds from the Neuronal Synchrony library. Generates a 2-D animation using Paper.js for each sound as a key is pressed. Uses howler.js for sound handling.

RGB GUESSING GAME | barisharslan.github.io/color_game.html
December 2018
A simple RGB value guessing game. Gets very tough on higher difficulties. Uses jQuery and Bootstrap.

WEBWIZARD | github.com/barisharslan/WebWizard
December 2018
A Python script that creates linked HTML, CSS, and JS files to get your web app set up within seconds. Uses PySimpleGUI for the GUI.

LYRICS | github.com/barisharslan/Lyrics
July 2018 – Present
A Python script utilizing Selenium and tKinter to display lyrics of a user input song. Selenium used for browser simulation and data scraping, and tKinter used for GUI implementation.

EXPERIENCE

MILESTONE TECHNOLOGIES, INC | IMAC Technician I
October 2017 – Present | Fremont, CA
- Installed and deinstalled computers, technical equipment, and servers for various companies.
- Collaborated with moving companies to relocate equipment and set back up in the clients' new space.
- Communicated with project leads to ensure quality control.
- Provided post move support to troubleshoot and resolve issues for users.
- Configured Linux software for nVIDIA DGX-1 servers.
- Used Restor to mass image MacBooks to prepare for deployment to employees.

CHIPOTLE MEXICAN GRILL | Kitchen Manager
October 2014 – November 2016 | Campbell, CA & Gilroy, CA
- Prioritized employee deployment for maximum productivity and efficiency in labor costs.
- Maintained proper inventory and performed food orders in accordance with budget.
- Interviewed potential employees, screening for Chipotle's 13 desirable characteristics.
- Coordinated marketing strategies such as fundraisers and promotions for nearby schools and companies.

GOOGLE ADSENSE | Webmaster and Support Agent
January 2011 - August 2013
- Developed a network of websites for advertisement monetization through Google Adsense.
- Employed basic HTML and CSS to build websites.
- Implemented various search engine optimization strategies to strengthen follower base.
